TABAI Iyadh

Full-Stack Developer (MERN | Real-Time Systems | SaaS)

Full-stack JavaScript developer specializing in MERN stack applications, real-time systems, and SaaS platforms. Experienced in building scalable web applications including booking systems, e-commerce platforms, and real-time chat/game systems. Strong backend focus with advanced experience in API design, authentication systems, and payment integrations (Stripe & crypto).

SKILLS

Frontend

- React.js, JavaScript (ES6+), UI development

Backend

- Node.js, Express.js, REST APIs, Authentication, Cron jobs

Database

- MongoDB, PostgreSQL

Systems & Tools

- WebSockets, Git, Stripe API, Crypto payments

PROJECTS

Pong-Rush — 2026

Real-time multiplayer ping pong game with synchronized gameplay and competitive mechanics

- **Real-time System:** Implemented WebSocket-based gameplay with low-latency state synchronization between players
- **Competitive Logic:** Built matchmaking system with ELO-based ranking and real-time score tracking
- **Tech Stack:** React, Node.js, WebSockets

Bookify — 2026

Booking platform with automated scheduling and cron-based task system

- **Scheduling System:** Developed calendar-based booking engine with conflict detection and availability management
- **Automation:** Implemented cron jobs for automated reminders, booking confirmations, and resource cleanup
- **Tech Stack:** MERN Stack, Cron Jobs, MongoDB

ShopFlow — 2026 (Ongoing)

Full e-commerce system with Stripe and crypto payment integration

- **Payment Integration:** Implemented dual payment processing with Stripe API and cryptocurrency transactions
- **Checkout System:** Built complete shopping cart and order management system with inventory tracking
- **Tech Stack:** MERN Stack, Stripe API, Blockchain payments

ChatApp — 2025

Real-time communication system with socket-based messaging architecture

- **Messaging Architecture:** Built real-time chat system with WebSocket connections, room management, and message persistence
- **Features:** Private messaging, group chats, typing indicators, and online presence tracking
- **Tech Stack:** React, Node.js, WebSockets, MongoDB

EDUCATION

Computer Science & Technology
Degree in Computer Science
2022 – 2026 (Expected)

TECH STACK

- MongoDB, PostgreSQL
- Express.js, Node.js
- React.js, JavaScript
- WebSockets, REST APIs
- Stripe, Crypto Payments
- Cron Jobs, Authentication

STRENGTHS

- Full-Stack Development
- Real-Time Systems
- SaaS Architecture
- API Design
- Payment Integration
- Scalable Backends

LANGUAGES

- Arabic (Native)
- French (Fluent)
- English (Professional)

INTERESTS

- Real-Time Applications
- SaaS Development
- System Architecture
- Payment Innovations

SummarAIze **2025**

AI document processing tool for text summarization and data extraction

- **Document Processing:** Engineered end-to-end data extraction pipeline for PDF parsing and AI-powered text analysis
- **Team Collaboration:** Led the project with iterative development and agile methodology
- **Tech Stack:** MERN Stack, AI APIs, PDF parsing libraries
